Press Release

Boiler System Monitoring and Management Seminar

Nalco Company, Hach, Jaffa, and Delta P team up to provide Boiler System Monitoring and Management Seminar

Anchorage - Tuesday, August 24th
Embassy Suites

Fairbanks - Thursday, August 26th
Westmark Hotel

Anchorage, Alaska: Nalco Company is hosting an information packed seminar targeted to those involved in all aspects of boiler operation and steam generation. The focus is on water treatment tools, inspection, and safety that can positively impact your production efficiency and profitability.

Following the introductory remarks, six breakout sessions will be hosted by Nalco, Hach, Jaffa, and Delta P. Each session will feature an interactive discussion allowing participants to get answers to individual questions and concerns. Two General Sessions will be held reviewing Basic Water Chemistry and Nalco's 3D Trasar Technology. The seminar is approved for 0.6 Continuing Education Credits (CUE's).

Breakout Sessions:

- Reverse Osmosis
- Water Chemistry Testing
- Pump Selection and Maintenance
- Deaeration
- Boiler System Construction and Repair Codes
- Ion Exchange
- Boiler Internal Treatment
- Steam and Condensate Systems
- Inspection and Safety
- Zero Defect Delivery
